

Chief Financial Officer, Kyield

Initially conceived two decades ago this year in a private knowledge systems lab in AZ, Kyield offers one of the most advanced artificial intelligence systems in the world. The Kyield OS includes a patented modular AI system that provides multiple key functions in one unified service, including strong governance and tailored augmentation for improved productivity, security, and prevention.

This should not be viewed as a start-up company, position, or role, but rather growth stage transition to a large-scale, pre-engineered system in managed service model as originally intended. The company has significant interest from premier investors and customers from several years of preparation and diligence.

The CFO will be working with senior-most executives in the private and public sectors. He/she will report to and work closely with the founder and CEO, and will serve as a key member of the executive team at Kyield.

The successful candidate will be deeply involved in our recently released HumCat offering that has been in R&D for many years. The HumCat runs on the Kyield OS for prevention of human-caused catastrophes, which can be bundled with cat bonds to provide customers with significant financial benefits due to the lower risk profile from certified systems (<http://www.kyield.com/technology/humcat.html>).

Position Information:

- Initially part-time possible but more likely short-term and nearly full-time, above average equity until growth financing is secured (\$20 million++), upon which is convertible.
- While prepped well, duration to close can't be guaranteed so it is essential that candidates be in a good position to take on what is an usual situation.
- Compensation post closing: Salary DOE, company paid medical, dental & vision coverage, life insurance, short-term disability, 401k, and vacation time.
- Currently located in Santa Fe, the permanent location TBD in or near a metro area served by a commercial airport in the Rocky Mountain region.

Essential Duties and Responsibilities:

- Direct and lead all of the financial activities of the company including preparation of financial pro formas, budgeting, summaries and forecast for future business decisions, growth, and economic outlook.
- Participates in financial analysis, planning and forecasting of company finances.
- Ramp up and supervise the billing manager, human resources specialist and accounts payable/payroll specialist.
- Advise the CEO as requested and needed.

Qualification Requirements:

- Proven CFO in working with large family offices and institutional investors in initiating, structuring and negotiating alternative debt and equity vehicles.
- Strong preference for successful financing to sustainability of new large-scale systems in growth mode with institutional investors and tier-one banks.
- MBA and CPA certification preferred.
- Desire and ability to help build an authentic, entrepreneurial market leader through growth stage to sustainability.
- Demonstrated leadership by example with integrity, effective interpersonal communications, organizational, and management skills.
- Ability to understand and effectively communicate advanced concepts and benefits of the type associated with our advanced AI system with multiple critical functions within one unified system.
- Requires hands-on computer proficiency including Microsoft office, (word, excel, outlook), accounting computer application systems and working knowledge of Internet and web-based applications.
- Excellent presentation and communications skills with senior decision makers on critical issues whether in virtual and in-person.
